Onderwerp: Letter of Gratitude

To whom it may concern,  
Dear ZGT-Overzee foundation,

With this letter we would, again, like to express our gratitude to the ZGT-Overzee foundation. We are very grateful for the generous donations we received and will be receiving soon. Recently we received a container with very useful equipment: ECG machine, blood pressure machines, beds, chairs, wheelchairs. Soon we will receive a container with all our medication for 2024. This medication container and the transport have been sponsored by ZGT-Overzee as well. All this donations and support from sponsors make it possible for the hospital to grow every day a little further.

We are now growing towards being the first rural trauma center in Sierra Leone. And last year we were upgraded to an official partner of the University of Sierra Leone Teaching Hospitals Complex. This makes us officially a teaching hospital. (With right, as we host 5 different education programs: state registered nursing, physiotherapy, surgical training program, pediatric training program and medical training program). Besides the education programs we also host the very busy Masanga Medical Research Unit (MMRU). All this improvements require staff that is dedicated and happy to work. And the donations with materials and other forms of support are essential for an enabling working environment.

We cannot finish this letter by also thanking our dedicated and resilient staff for the work they do every day in a (financially) very difficult situation. The staff of Masanga are the real heroes in the Masanga story!

In name of all the staff we would, once again, like to thank you for the donation.

And we hope that you keep considering us for any possible future donations.

We are very grateful for this collaboration.

Thank you very much!
